Objective

Multifaceted Software Developer with 4+ years of experience in Flutter, PHP, Laravel, and Symfony. Demonstrated ability to create high-performance mobile and web applications with strong UI/UX and backend integrations. Experienced in CI/CD, agile development, and data-driven development using Python and SQL.

Experience

Backend Developer | Brain-Socket (Damascus, Syria)

3/2025 - Present

Worked on implementing and developing multiservice system [“Register System”](#)

- Integrated Mailer, SMS, and Registration systems using Symfony, MongoDB, and Kafka, ensuring seamless communication and supporting over 1,000 daily user interactions.
- Streamlined user account management processes across systems, reducing synchronization errors by 25% through optimized creation, update, and permission handling.
- Enhanced real-time synchronization between master and sub-systems, improving overall system consistency and boosting operational efficiency by 30%.

Technologies Used: Symfony | PHP | MongoDB | Redis | Kafka.

Full-Stack Developer | Codrex.co (Damascus, Syria)

4/2021 - 8/2021

Contributed to the development of multiple projects:

- **Fatora (E-Receipt Management System)**

- Digitized Al-Amal Company's sales receipt process, reducing paper usage by 98%.
- Enabled sales staff to sign, store, and send receipts electronically, reducing generation time to under 10 seconds.
- Enhanced operational workflow, efficiency, and customer experience

Technologies Used: Flutter | Laravel | REST API.

- **Online Real Estate Portal**

- Created a web-based platform for clients to search for existing properties in buildings under construction, with comprehensive details
- Allowed home reservations for quicker communication and sales, reducing property presentation time by 40%.

Technologies Used: HTML | CSS | JS | PHP.

Instructor Robotic and Programming | Syra-Robot (Damascus, Syria)

12/2018 - 9/2019

- Taught and mentored children and adolescents in foundational robotics and programming, focusing on EV3, Arduino, MBot, and Edison Robots.
- Trained over 150 students, fostering a passion for robotics, coding, and hands-on problem-solving.

Education

Bachelor's Degree in Software Engineering | Damascus University

Sep 2017 – Aug 2024

In-depth coursework covering fundamental principles of software engineering, including software design, algorithms, data structures, database management systems, programming languages such as C, C++, and Java.

Graduation project was: ERP System for Cosmetic via Odoo Open Source

Developed an ERP system for a handmade cosmetic factory, computerizing key functions including accounting, sales, purchasing, quality control, and HR

Reduced paper reliance by 45% and improved operational efficiency by 20%.

Projects

Easy App – Healthcare Job Application

Nov 2024 – Jan 2025

Expanded a mobile app to simplify healthcare job applications in the Gulf, supporting secure document uploads and processing over 200 submissions monthly.

- Automated notifications for acceptance/rejection, reducing processing time by 36%.
- Centralized request management, reducing manual handling by 80%, and improving service provider efficiency.
- Facilitated a seamless application process, reducing user wait times by 50%.

Technologies Used: Flutter | Firebase | PHP (CodeIgniter) | MySQL | PhpMyAdmin

STAM, Suria-Tech Academy, Malaysia

Mar 2024 – April 2024

Designed and enhanced the official website for Suria-Tech Academy to manage course listings, teacher recruitment, and course suggestions.

- Increased course inquiries by 40%, resulting in 100+ student registrations within the first month.
- Integrated Notion as an admin dashboard, cutting staff processing time by 25% and boosting digital engagement.

Technologies Used: NextJS | TypeScript | Tailwind-CSS | GitLab.

RBCs Lectures System – Empowering Student Learning

Oct 2023 – Nov 2023

Enhanced a mobile app for university students to access and manage lecture archives.

- Attracted 2,000+ active users in the first month, hosting 500+ lecture uploads.
- Improved lecture accessibility by 60% with faster content browsing and downloads.

Technologies Used: Laravel | Flutter | Firebase

Glow-App – The Network for Beauty Clinics

June 2024 – Aug 2024

Built a mobile app to connect beauty clinics and customers, enabling easy service browsing and appointments.

- 2,000+ active users within 3 months, hosting 500+ service listings.
- Streamlined appointment bookings, improving clinic workflow efficiency by 25%.

Technologies Used: Laravel | Flutter | Firebase |

Dental Knights – Social Network for Dentists

Oct 2022 – June 2023

Creating a platform for dentists and students to share knowledge and articles, featuring a dentist discovery tool.

- Gained **200+ registered users** in the first 3 months.
- Increased engagement by adding a **searchable directory** for local practitioners.

Technologies Used: Flutter | Firebase | PHP(CodeIgniter) | MYSQL | PhpMyAdmin

UBC Food – E-commerce System with B2B & B2C

Oct 2022 – April 2023

Built a multi-app e-commerce platform for UBC with separate interfaces for wholesalers and pickers.

- 1,000+ downloads in the first 3 months, supporting daily transactions for B2B and B2C customers.
- Streamlined order placement, inventory tracking, and dispatch, improving operational efficiency by 35%.

Technologies Used: Flutter | Firebase | Software development Life cycle | Agile Mythology

Skills

Development: Java, PHP, Python, SQL, Laravel, Symfony, NextJS, Flutter

DevOps & Tools: Docker, Kafka, CI/CD Pipelines, OAuth, Git

Databases: MySQL, MongoDB, Redis, Datawarehouse

Development Principles: Microservices, Clean Architecture, MVC, SOLID, Restful Apis, Graph-QL, Design Pattern.

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration, Leadership

AWARDS

- World Robot Olympiad (WRO) International Final, India** Nov 2017
 Won 6rd place in Open Senior Category representing Syria as part of Team "3mmerha", competing against 450 teams from 50 countries.
- (WRO) International Final, Thailand** Nov 2018
 Won 13rd place in Open Senior Category representing Syria as part of Team "Robotato", competing against 484 teams from 63 countries.
- Future Inventor in Business International Final, Thailand** Nov 2018
 Won 3rd place as part of Team "Robotato", competing against 484 teams from 63 countries.
